Abstract

A very simple template for an article class document.

Introduction

The intro..

Results

A Late Middle Stone Age common ancestry for contemporary humans

Deep population structure but not archaic admixture within Africa

Reconciling multiple lines of genetic evidence

Discussion

The Middle Stone Age in Africa

Contrasting archaic admixture and a weakly structured stem

Methods

A placeholder citation (Kelleher et al., 2016).

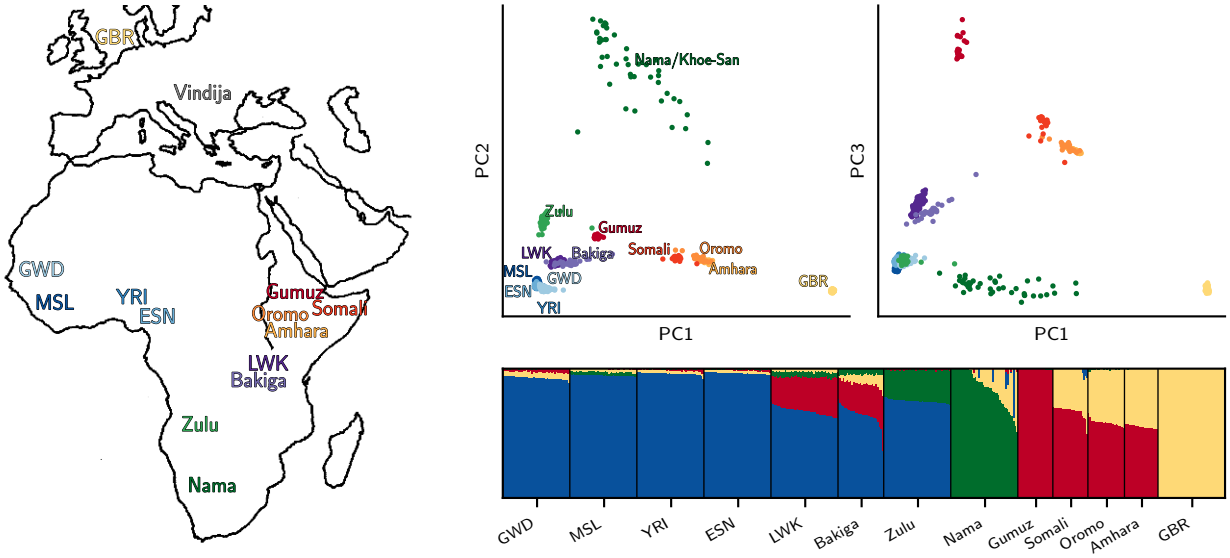

Figure 1: **The first figure**. The geographic and genetic diversity of populations across Africa.

Figure 2: **The second main figure**. A placeholder - best fit model(s).

Acknowledgements

Figure 3: **The third main figure**. A placeholder - validation (Relate and cSFS).

Figure 4: **The fourth main figure**. A placeholder - predictions (FST and/or f4).
